

9 ACCESSORIES

This chapter provides some basic information for the safe operation of accessories. You must read and follow these instructions before using the accessory. If you are uncertain whether you have all of the instructions, call PJ Trailers at 800-452-9116 before operating the accessory.

9.1 ACCESSORY BATTERY

Your trailer may be outfitted with an accessory battery that operates lighting, dump body or other accessories. An accessory battery may be kept charged either by the tow vehicle or by using an external battery charger.

A disconnect switch may be provided to disconnect the accessory battery when you do not plan to be using the trailer for an extended period, such as seasonal storage. If there is no disconnect switch, then remove the cables from the battery terminals.

The accessory battery must be kept in a charged condition during storage. The battery could freeze and break if it becomes discharged.
